

Internship Workflow Management System (IWMS)

Use Case 1: Authenticate User

Use Case Number:	001		
Use Case Code:	UC-AUTH 001		
Use Case Name:	Authenticate User		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Administrator, Student, Company Supervisor, Internship Coordinator
Short Definition:	A user accesses the Internship Workflow Management System (IWMS) by providing valid credentials to reach their role-specific module.
Pre-condition:	The user must be registered in the system or have an active cs.hacettepe account.
Post-condition:	The company is officially registered and active in the system, or the registration request is denied.
Priority:	High
Frequency of Occurrence:	Multiple times per day per user
Main Path:	1. The user navigates to the IWMS login page. 2. The user enters their login ID (or cs.hacettepe credentials for students) and password. 3. The user clicks the "Login" button. 4. The system validates the entered credentials against the database. 5. The system authenticates the user. 6. The system redirects the user to their respective module (Administration, Student, Company, or Coordinator).

Alternative Path:	<i>A.04: If the user enters an incorrect login ID or password, the system provides a warning message stating "Incorrect login ID or password" and asks the user to retry.</i> <i>A.02: If the user forgets their password, they click the "Reset Password" link. The system allows the user to reset their password via email authentication.</i>
Containing Use-Case(s)	None
Special Requirements:	<i>The system shall secure user accounts with strict password protection.</i>
Assumptions:	<i>The user has a stable internet connection and access to their registered email for password resets.</i>
Note:	Students strictly use their cs.hacettepe credentials. Administrators log in using a specific administrator login ID.

Use Case 2: Manage Company Registration

Use Case Number:	002		
Use Case Code:	UC-COMP-002		
Use Case Name:	Manage Company Registration		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Company Supervisor, Administrator		
Short Definition:	A company supervisor submits a registration request for their company, which is then reviewed and either approved or rejected by the system administrator.		
Pre-condition:	The company supervisor must have the required company information and not be previously registered.		
Post-condition:	The company is officially registered and active in the system, or the registration request is denied.		
Priority:	High		
Frequency of Occurrence:	Occasional (once per new company)		
Main Path:	<i>1. The Company Supervisor accesses the company registration page on the system.</i>		

	2. The Company Supervisor enters the required company details and submits the registration form. 3. The system saves the registration request with a "pending" status. 4. The Administrator logs into the Administration Module. 5. The Administrator navigates to the pending company registrations section. 6. The Administrator reviews the submitted company details. 7. The Administrator approves the company registration. 8. The system updates the company status to "approved" and sends a confirmation email to the Company Supervisor.
Alternative Path:	A.02: If the Company Supervisor leaves mandatory fields blank, the system displays an error message and prevents the submission until all required fields are filled. A.07: If the Administrator finds the company details invalid or inappropriate, they reject the registration. The system updates the status to "rejected" and sends an informative email to the Company Supervisor. A.yy
Containing Use-Case(s)	None
Special Requirements:	The system must keep a secure audit log of all registration approvals and rejections by the administrator.
Assumptions:	The Administrator checks the system periodically for new pending company registrations.
Note:	Only approved companies can be selected by students for their internship applications.

Use Case 3: Manage Academic Periods and Rules

Use Case Number:	003		
Use Case Code:	UC-ADM-003		
Use Case Name:	Manage Academic Periods and Rules		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Administrator, Internship Coordinator
Short Definition:	The Administrator and Internship Coordinator configure the system by defining academic periods, setting submission deadlines, and updating internship rules.
Pre-condition:	The user must be logged into the system with Administrator or Internship Coordinator privileges.
Post-condition:	The academic periods, deadlines, and rule engine parameters are updated and actively enforced by the system for all internships.
Priority:	High
Frequency of Occurrence:	Low (Typically at the beginning or end of a semester)
Main Path:	1. The user navigates to the "Period Management" or "Rule Configuration" module. 2. The user selects the option to create or edit an academic internship period. 3. The user enters the start and end dates for the new internship semester. 4. The user configures specific submission deadlines for internship reports and related documents. 5. The user adjusts rule engine parameters (e.g., minimum 20 working days, 1st-year restriction). 6. The user clicks the "Save Configuration" button. 7. The system validates the entered dates and rule parameters.

	8. The system updates the active rules in the database and displays a success message.
Alternative Path:	A.07: If the user enters conflicting dates (e.g., an end date that is earlier than the start date), the system displays an error message and prompts the user to correct the dates. A.07: If the user leaves mandatory rule parameters blank, the system prevents saving and highlights the missing fields.
Containing Use-Case(s)	Includes UC-01 (Authenticate User)
Special Requirements:	Any changes made to the core rule engine parameters must be securely logged for audit purposes.
Assumptions:	The university's official academic calendar is finalized before the coordinator configures the system dates.
Note:	Coordinators typically manage semester dates and submission deadlines, while Administrators manage the core rule engine parameters.

Use Case 4: Submit and Approve Internship Application

Use Case Number:	004		
Use Case Code:	UC-APP-004		
Use Case Name:	Submit and Approve Internship Application		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Student, Company Supervisor, Internship Coordinator		
Short Definition:	A student selects an approved company and submits an internship application, which the company supervisor then approves, followed by system validation of internship rules.		
Pre-condition:	The student must be logged in and eligible for an internship. The selected company must be registered and approved in the system.		
Post-condition:	The internship application is successfully approved, and the student is officially assigned to the company for the specified period.		
Priority:	High		

Frequency of Occurrence:	Once per student per internship period.
Main Path:	1. The student logs into the Student Module. 2. The student selects an approved company from the system list. 3. The student fills out the internship application details and submits the request. 4. The system automatically validates the student's eligibility (e.g., not in the first year, no previous internship at the same company). 5. The system changes the application status to "Pending Company Approval". 6. The Company Supervisor logs into the Company Module. 7. The Company Supervisor reviews the pending application and declares the presence of the required engineer (Computer/Electrical-Electronic Engineer). 8. The Company Supervisor approves the student's internship acceptance. 9. The system updates the application status to "Approved" and sends a notification to the student.
Alternative Path:	A.04: If the system detects a rule violation (e.g., the student is attempting a second internship at the same organization), the system blocks the submission, displays an error message, and asks the student to select a different company. A.08: If the Company Supervisor rejects the application, the system updates the status to "Rejected", notifies the student, and terminates the application process.
Containing Use-Case(s)	Includes UC-01 (Authenticate User)
Special Requirements:	The system must automatically enforce the minimum 20-working-day rule and other constraints specified in the Internship Instructions during the application phase.
Assumptions:	The company has the necessary engineering staff required by the department to supervise the student.
Note:	The Internship Coordinator can monitor this process but does not need to manually approve each application as long as the automatic rule engine parameters are met.

Use Case 5: Generate and Submit Internship Report

Use Case Number:	005		
Use Case Code:	UC-STU-005		
Use Case Name:	Generate and Submit Internship Report		
Depicter:	Mehmet Emin Polat	Last Modificatory:	

Description Date:	25/03/2026	Last Modification Date:	
-------------------	------------	-------------------------	--

Actor(s):	Student
Short Definition:	A student generates their internship report using structured system templates, uploads necessary documents, and submits it for evaluation before the deadline.
Pre-condition:	The student must be logged in, have an approved internship application, and have completed their internship period.
Post-condition:	The internship report is successfully submitted, and the internship status is updated to "Pending" for coordinator review.
Priority:	High
Frequency of Occurrence:	Once per completed internship per student
Main Path:	1. The student logs into the Student Module. 2. The student navigates to the "Internship Report" section. 3. The student selects the option to generate a report via structured templates. 4. The student fills out the required daily/weekly sections of the report template. 5. The student uploads any necessary supplementary documents. 6. The student clicks the "Submit Report" button. 7. The system validates the submission against the configured deadline. 8. The system saves the report and updates the internship status to "Pending". 9. The system displays a success message to the student.

Alternative Path:	<i>A.04: If the student leaves mandatory sections of the template blank, the system displays an error message highlighting the missing fields and prevents submission.</i> <i>A.07: If the student attempts to submit the report after the configured deadline, the system blocks the submission and displays a late submission warning.</i>
Containing Use-Case(s)	<i>Includes UC-01 (Authenticate User)</i>
Special Requirements:	<i>The system must allow students to save their progress as a draft before the final submission.</i>
Assumptions:	<i>The student has successfully completed the minimum 20 working days at the company.</i>
Note:	Submitted reports cannot be edited by the student unless the status is later changed to "Revision Required" by the Coordinator.

Use Case 6: Evaluate Internship and Apply Signature

Use Case Number:	006		
Use Case Code:	UC-COMP-006		
Use Case Name:	Evaluate Internship and Apply Signature		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Company Supervisor		
Short Definition:	The Company Supervisor evaluates the student's performance, digitally fills out the required evaluation documents, and applies a digital signature to finalize the company-side approval.		
Pre-condition:	The student must have completed their internship period at the company.		
Post-condition:	The Internship Result Document and Internship Report Evaluation Document are securely saved, signed, and available for the Internship Coordinator to review.		
Priority:	High		
Frequency of Occurrence:	Once per student at the end of their internship		
Main Path:	<i>1. The Company Supervisor logs into the Company Module.</i> <i>2. The Company Supervisor navigates to the "Track Supervised Students" section.</i>		

	3. The Company Supervisor selects a student who has completed their internship. 4. The Company Supervisor digitally fills out the Internship Result Document. 5. The Company Supervisor digitally fills out the Internship Report Evaluation Document. 6. The Company Supervisor applies a digital signature (or uploads a scanned, signed, and stamped copy). 7. The Company Supervisor clicks the "Submit Evaluation" button. 8. The system validates the signature and ensures all mandatory fields are filled. 9. The system saves the documents and updates the student's internship status to "Evaluated by Company".
Alternative Path:	A.04: If the Company Supervisor leaves mandatory evaluation criteria blank, the system highlights the missing fields and prevents submission. A.06: If the digital signature verification fails or the uploaded file format is invalid, the system displays an error message and asks the supervisor to retry.
Containing Use-Case(s)	Includes UC-01 (Authenticate User)
Special Requirements:	The system must securely handle and store digital signatures or uploaded scanned documents to ensure authenticity.
Assumptions:	The Company Supervisor has observed the student sufficiently to provide an accurate evaluation.
Note:	These documents are critical for the final grading by the academic coordinator.

Use Case 7: Monitor Compliance and Coordinate Internships

Use Case Number:	007		
Use Case Code:	UC-COO-007		
Use Case Name:	Monitor Compliance and Coordinate Internships		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Internship Coordinator
Short Definition:	The Internship Coordinator monitors student submissions, tracks compliance with departmental rules, reviews statistics, and sends feedback regarding the final internship status.
Pre-condition:	The Internship Coordinator must be logged into the system. The internship evaluation period must be active.
Post-condition:	Student internship statuses are updated (e.g., Approved, Rejected, Revision Required), and official feedback is delivered to the students.
Priority:	High
Frequency of Occurrence:	Frequent (especially during the internship evaluation period)
Main Path:	1. <i>The Internship Coordinator logs into the Coordinator Module.</i> 2. <i>The Coordinator navigates to the "Document Submission Compliance" dashboard.</i> 3. <i>The system displays a list of pending student submissions and automatically flags any rule violations (e.g., late submissions, missing signatures).</i> 4. <i>The Coordinator selects a specific student's record to review their submitted Internship Report and company evaluation documents.</i> 5. <i>The Coordinator evaluates the content of the report.</i> 6. <i>The Coordinator updates the internship status to "Approved", "Rejected", or "Revision Required".</i>

	7. The Coordinator enters specific feedback or revision instructions for the student. 8. The Coordinator clicks "Submit Evaluation". 9. The system saves the final status and sends an automated notification with the feedback to the student.
Alternative Path:	A.02: If the Coordinator needs to upload an eligible student list before the internship starts, they select "Upload Student List", choose a valid file, and the system imports the eligible students into the database. A.06: If the status is set to "Revision Required", the system automatically unlocks the report submission feature for that specific student and sets a new temporary deadline.
Containing Use-Case(s)	Includes UC-01 (Authenticate User)
Special Requirements:	The automatic rule validation engine has already processed basic compliance checks (like the 20-day rule) before the coordinator's manual review.
Assumptions:	If there is an assumption about the definition, it will be written
Note:	The coordinator relies heavily on the automatic rule validation to reduce manual administrative workload.

UC-08: Manage System Audit and Meta-information

Use Case Number:	008		
Use Case Code:	UC-COO-008		
Use Case Name:	Manage System Operation and Security		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Administrator
Short Definition:	The Administrator manages system users, oversees security by reviewing audit logs, and updates general system content such as FAQs and announcements.
Pre-condition:	The Administrator must be authenticated and logged into the Administration Module.

Post-condition:	System settings, user statuses, or system content (FAQs/Announcements) are successfully updated.
Priority:	Medium
Frequency of Occurrence:	Occasional (weekly or as needed)
Main Path:	1. The Administrator logs into the Administration Module. 2. The Administrator navigates to the "System Operations" dashboard. 3. The Administrator selects "Manage Users" to view the list of all system users (students, supervisors, coordinators). 4. The Administrator updates a specific user's status (e.g., activates or deactivates an account) and saves the changes. 5. The Administrator navigates to the "Audit Logs" section. 6. The Administrator reviews recent system activities and security events. 7. The Administrator navigates to the "Announcements & FAQ" section.

	8. The Administrator creates a new announcement or FAQ entry and publishes it. 9. The system applies all changes and displays a confirmation message.
Alternative Path:	<i>A.04: If the Administrator attempts to deactivate the last remaining active Administrator account, the system prevents the action and displays an error message.</i> <i>A.08: If the Administrator leaves the announcement title or content blank, the system prevents publishing and highlights the required fields.</i>
Containing Use-Case(s)	<i>Includes UC-01 (Authenticate User)</i>
Special Requirements:	<i>All administrative actions (especially user deactivations) must be strictly and automatically recorded in the secure audit log.</i>
Assumptions:	The system automatically records all critical actions (logins, document submissions, approvals) in the background so the Administrator can review them.
Note:	This use case is critical for maintaining the overall health, security, and proper configuration of the IWMS platform.

Use Case 9: Interact with Support System

Use Case Number:	009		
Use Case Code:	UC-SUP-009		
Use Case Name:	Interact with Support System		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Student, Company Supervisor, Internship Coordinator
-----------	---

Short Definition:	A user interacts with the system's support module to find answers via static FAQs, an autocomplete search bar, or an automated Chatbot.
Pre-condition:	The user must be logged into their respective module.
Post-condition:	The user receives the necessary information or guidance regarding their internship queries.
Priority:	Medium
Frequency of Occurrence:	Whenever a user needs assistance with system features or internship rules.
Main Path:	1. The user navigates to the "Q&A and Support" section of the system. 2. The system displays a categorized list of static Frequently Asked Questions (FAQs). 3. The user starts typing a specific question into the support search bar. 4. The system provides real-time autocomplete suggestions and answer previews as the user types. 5. The user selects an autocompleted question to view its full answer. 6. If the user does not find the answer, they click on the Chatbot icon. 7. The user types a custom question into the Chatbot interface. 8. The Chatbot analyzes the query and provides a relevant, automated response based on the internship instructions. 9. The user closes the support module and returns to their workflow.
Alternative Path:	A.04: If the autocomplete search yields no matching results, the system displays "No results found" and prompts the user to ask the Chatbot.

	<i>A.08: If the Chatbot cannot understand or resolve the user's specific query, it provides a fallback message directing the user to contact the Internship Coordinator directly via email.</i>
Containing Use-Case(s)	<i>Includes UC-01 (Authenticate User)</i>
Special Requirements:	<i>The search function must be highly responsive to provide seamless autocomplete as the user types. The Chatbot's knowledge base must strictly follow the official Internship Instructions.</i>
Assumptions:	<i>The Administrator has already populated the database with FAQs and the Chatbot is properly configured.</i>
Note:	<i>This use case specifically fulfills the required functional features: Static FAQs, autocomplete search, and Chatbot integration.</i>

Use Case 10: Review Internship History and Submit Feedback

Use Case Number:	010		
Use Case Code:	UC-HIST-010		
Use Case Name:	Review Internship History and Submit Feedback		
Depicter:	Mehmet Emin Polat	Last Modificatory:	
Description Date:	25/03/2026	Last Modification Date:	

Actor(s):	Student, Company Supervisor		
Short Definition:	The user views their past internship records to check compliance (e.g., BBM 325 / BBM 425 status) and submits required feedback surveys at the end of the internship lifecycle.		
Pre-condition:	The user must be logged into the system. The internship evaluation process must be finalized.		
Post-condition:	The feedback survey is securely recorded in the system, and the user's internship history status is fully updated.		
Priority:	Medium		
Frequency of Occurrence:	Once per completed internship.		
Main Path:	<i>1. The user logs into their respective module (Student or Company Module).</i> <i>2. The user navigates to the "Internship History & Feedback" section.</i>		

	3. The system displays the user's past internship records and current compliance status (e.g., whether BBM 325 is completed and BBM 425 is eligible). 4. The user selects a recently completed internship record that requires feedback. 5. The system presents the official internship feedback survey form. 6. The user fills out the survey questions regarding their overall experience. 7. The user clicks the "Submit Survey" button. 8. The system saves the survey responses to the database. 9. The system marks the feedback requirement as "Completed" and displays a thank you message.
Alternative Path:	A.06: If the user leaves mandatory survey questions unanswered, the system highlights the missing fields, prevents submission, and asks the user to complete them. A.03: If the user has no past or completed internships on record, the system simply displays "No internship history available" and hides the survey option.
Containing Use-Case(s)	Includes UC-01 (Authenticate User)
Special Requirements:	Survey results should be linked to the specific semester and company for future statistical analysis by the Coordinator.
Assumptions:	The Coordinator has finalized the grading/evaluation phase, triggering the system to request feedback from the student and company.
Note:	This use case officially closes the loop for a single internship process, fulfilling the requirement for tracking history and collecting feedback.
